BEARS SLEEP SCREENING ALGORITHM

The "BEARS" instrument is divided into five major sleep domains, providing a comprehensive screen for the major sleep disorders affecting children in the 2- to 18-year old range. Each sleep domain has a set of age-appropriate "trigger questions" for use in the clinical interview.

B = bedtime problems
E = excessive daytime sleepiness
A = awakenings during the night
R = regularity and duration of sleep
S = snoring

Examples of developmentally appropriate trigger questions:

	Toddler/preschool (2-5 years)	School-aged (6-12 years)	Adolescent (13-18 years)
